

ANNEX Industrial Electrification

Accelerate innovation and implementation of electrification for achieving decarbonisation in the industry

4 TASKS

A network of experts and stakeholders is at the heart of the annex activities.

To reach the common goals, 4 different tasks are performed in the annex, these tasks are linked as is shown in the picture.

Energy Scenario's & Policy

Collect input from different Member States on available scenario's and policy. Identify relevant target sectors per region.

Adjusting scenario's based upon results from the roadmap

Roadmap 2050

Develop and maintain a multi-year roadmap for technology development for industrial electrification

Shared Development Programs

Initiate and facilitate collaborative development of technology and associated business models.

Strive for

- Showcases
- Demo Plants
- Field Labs

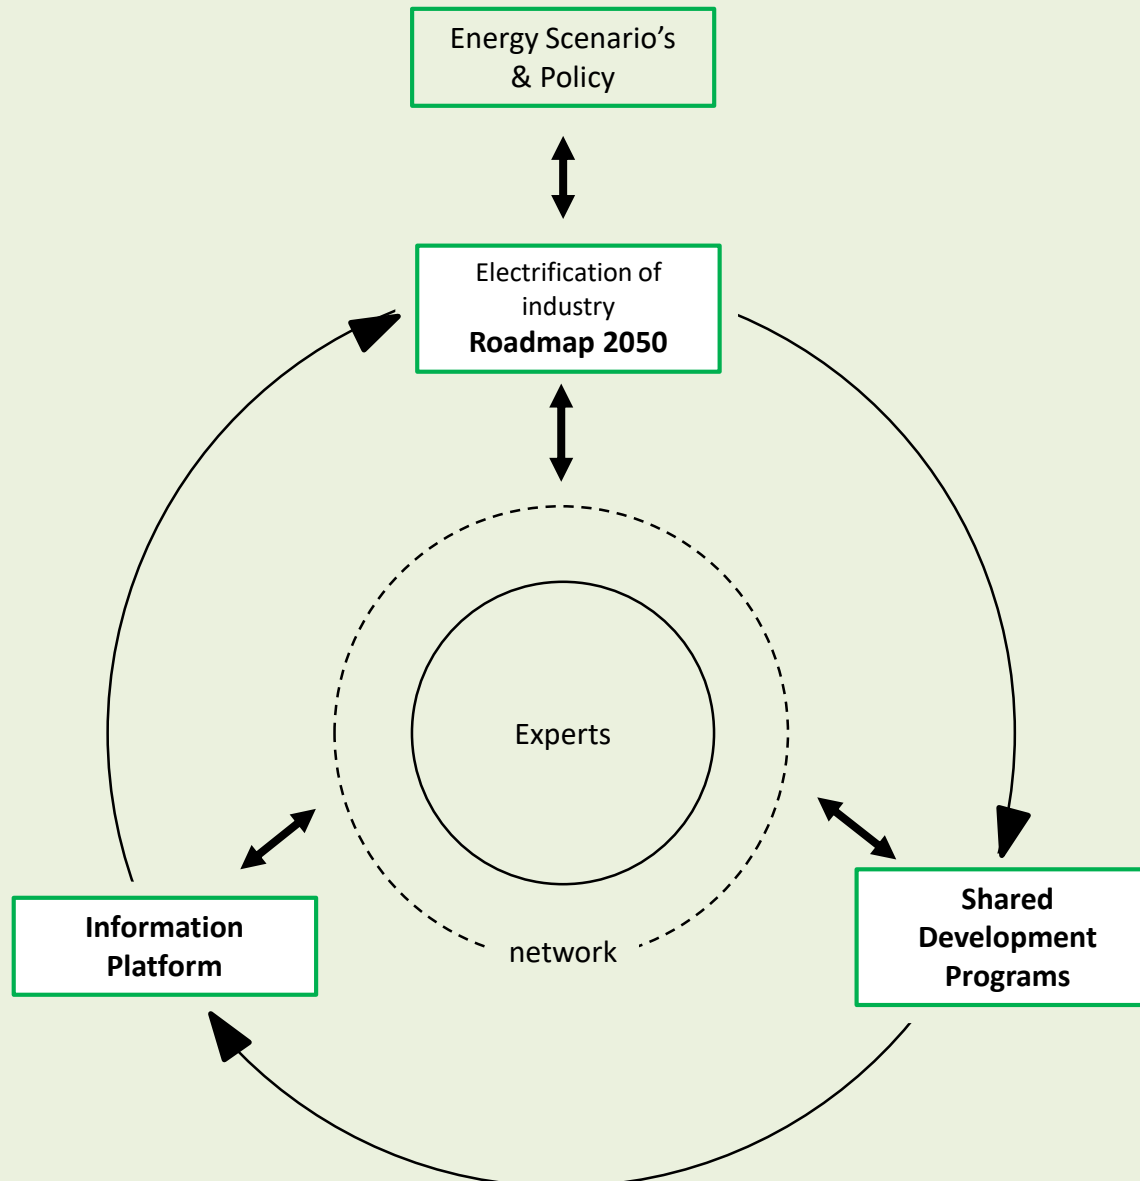

Information Platform

Create a platform to collect, analyse and share information on electrification.

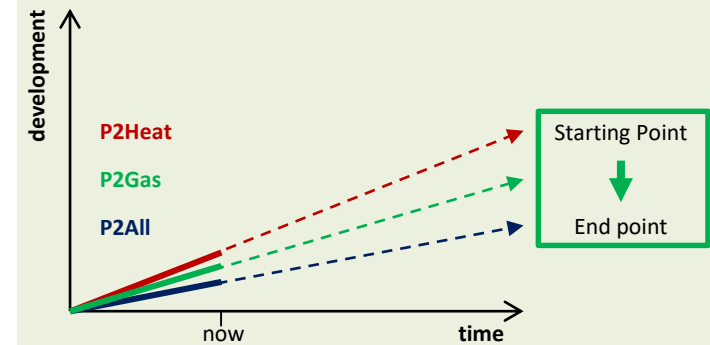

Connecting the different topics:

- Technology
- Scenario's
- Policies
- Markets
- ...

INTERACTIVE APPROACH

START SMALL, GROW QUICK

TOWARDS COMMON GOAL

Accelerate innovation
Decarbonize industry
Agenda setting
